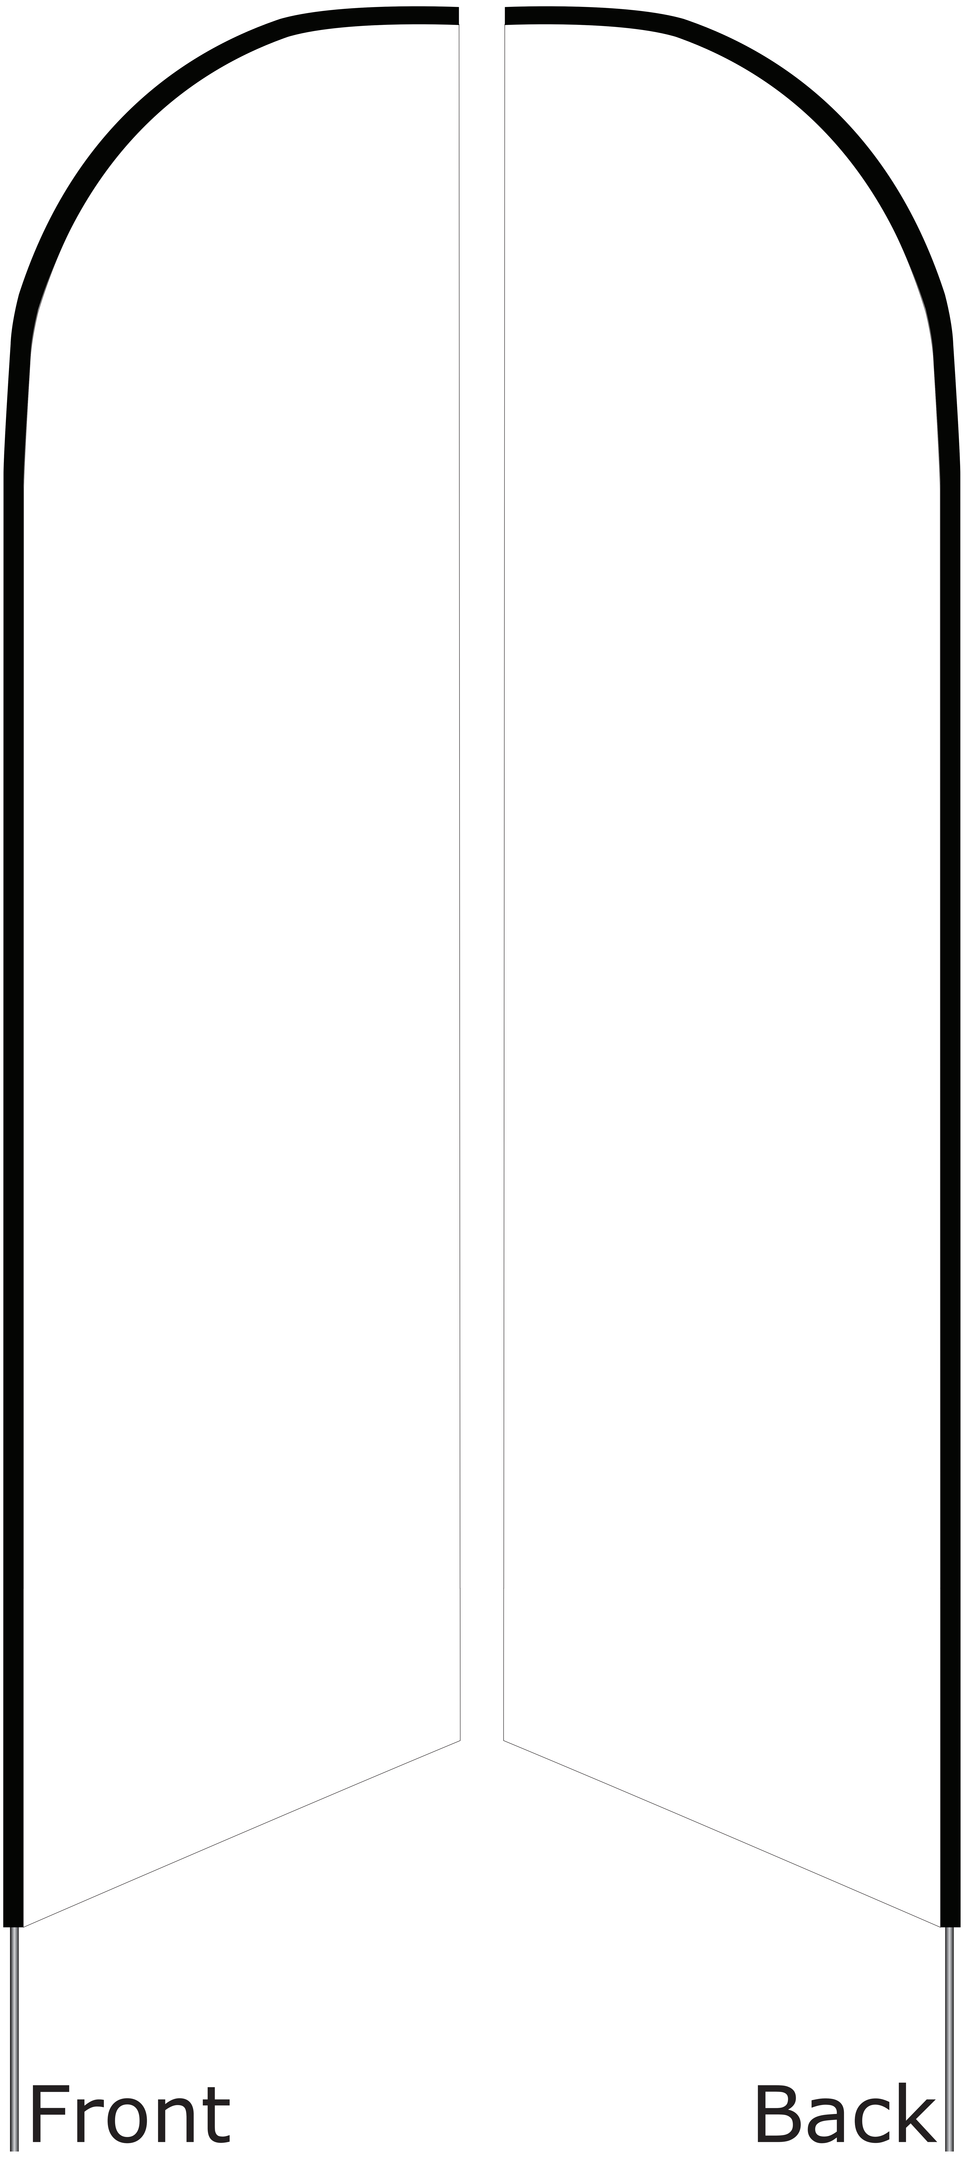
Design Notes:


1. All graphics files in the design layout at least 100 dpi.
2. All graphic files must use CMYK mode to ensure the best printing results. If you want to get a specific matching color, you must provide a PMS color, otherwise we can not guarantee the color matching.
3. Acceptable files in the format: (.ai) (.pdf) (.eps) (.cdr).
4. Inner blue line is printing area (in case of shrinkage).
5. Proportion is 1:1, please do not change the proportion.
6. Color variation could not be avoided due to a little different color display on different computers and imperfect printing technology
