Design Notes:

- 1. All graphics files in the design layout at least 100 dpi.
- 2. All graphic files must use CMYK mode to ensure the best printing results. If you want to get a specific matching color, you must provide a PMS color, otherwise we can not guarantee the color matching.
- 3. Acceptable files in the format: (.ai) (.pdf) (.eps) (.cdr).
- 4. Inner blue line is printing area (in case of shrinkage).
- 5. Proportion is 1:1, please do not change the proportion.
- 6. Color variation could not be avoided due to a little different color display on different computers and imperfect printing technology
