This Report can be reproduced only complete, its part only with the written permission of this testing laboratory.

Results are only for tested samples. The results relate only to the tested samples. In case the laboratory is not responsible for the sampling phase, the results refer to the sample as is received. If the sampling is not the subject of accreditation, the identification data (sample name, date and time of sampling) are stated in the protocol exclusively as provided by the customer and the laboratory is not responsible for them.

These expanded uncertainties of measurement are obtained by multiplying of standard uncertainty of measurement by extending coefficient $k=2$ (for confidence level 95%). Uncertainty of sampling not included.

"<" - result is below the detection limit, ">" - result is higher than mentioned value

Methods in Kind column: "A" test in the scope of accreditation, "N" test out of the scope of accreditation, "SA" subcontract in the scope of accreditation,
